Professional Summary

Full Stack Web Developer with hands-on experience in building responsive web applications using React.js, JavaScript, Python, Django, SQL, HTML, and CSS. Skilled in frontend and backend development, REST APIs, authentication systems, database management, and deployment. Experienced in developing scalable web solutions, integrating databases, and using Git/GitHub for version control. Passionate about solving real-world problems through technology and continuously learning modern software development practices.

Education

Ajay Kumar Garg Engineering College, Ghaziabad 2023 – 2026
B.Tech – Computer Science and Engineering (Data Science) **77%**

Technical Skills

Languages: Python, JavaScript, SQL
Frontend: HTML5, CSS3, React.js, Tailwind CSS
Backend: Django, REST APIs
Database: MySQL, SQLite
Tools: Git, GitHub, VS Code, Postman, Vercel
Core Skills: Full Stack Development, API Integration, Authentication, Responsive Design, Problem Solving

Experience

IBM Internship Aug 2025 – Oct 2025
Web and Mobile Development Intern

- Developed full-stack web applications using HTML, CSS, JavaScript, Django, and MySQL.
- Built responsive user interfaces and integrated backend functionalities.
- Gained practical exposure to software development lifecycle (SDLC) and project deployment workflows.
- Collaborated with team members to develop and enhance web application features.
- Implemented authentication and authorization systems for secure user access.
- Worked with relational databases and optimized SQL queries for improved performance.
- Participated in debugging, testing, and deployment activities.
- Contributed to e-commerce functionalities including product and order management.

Projects

Anmol FinTech – React.js, JavaScript, Tailwind CSS GitHub — Live Demo

- Developed a responsive FinTech dashboard for monitoring financial metrics and analytics.
- Built reusable React components and interactive user interfaces.
- Implemented charts, cards, and dynamic data visualization modules.
- Deployed the project using Vercel and managed source code using GitHub.
- Implemented responsive layouts ensuring compatibility across desktop, tablet, and mobile devices.
- Followed component-based architecture to improve code reusability and maintainability.

AnmolTweet – Django, Python, SQLite GitHub — Live Demo

- Built a social media web application with tweet creation, editing, deletion, and image upload features.
- Implemented secure authentication, profile management, and database integration.
- Developed backend business logic using Django and Django ORM.
- Utilized Git and GitHub for version control and project maintenance.
- Implemented CRUD operations for efficient content management and user interaction.
- Integrated media upload functionality and optimized database queries for faster performance.

Quiz App – HTML, CSS, JavaScript, PHP GitHub

- Developed a web-based quiz application with dynamic question handling and score calculation.
- Implemented result generation and user performance tracking functionality.
- Designed responsive interfaces for seamless user experience.
- Tested and debugged the application using XAMPP and Eclipse IDE.
- Applied form validation techniques to improve user experience and input accuracy.
- Structured application logic to ensure smooth navigation and efficient score evaluation.

Certifications

Responsive Web Design – FreeCodeCamp
Demystifying Generative AI for Leaders – Infosys
Python Programming – Infosys
